

## Referee's Pre-Game Instructions

### For Entry Level Referees

May 2018

#### Overall Strategy

- Introduce each other, know the other referees names
- Who the teams are
- Discuss team work, support one another, communication, and eye contact at every stoppage

#### Offsides

- Stay with the second last defender or the ball if it is nearer to the goal line
- Wait and see if the player who is in an offside position gets involved in active play, or interferes
- Raise your flag and keep the flag up until I blow the whistle
- If I miss the offside flag, continue to keep the flag raised and yell my name until you have got my attention, or the ball has been cleared by the defending team.
- If you are in doubt if it is offside, do not raise the flag, error on the side of the attacker.

#### Fouls/Misconducts

- Talk to players and be preventative
- If you see a foul in front of you, raise your flag and wiggle it side to side, when whistle is blown give direction
- If you think a foul deserves a Yellow card, tap your badge after making the call, or if I miss something wait until the next stoppage and call me over.
- If you think you see something that deserves a Red card, immediately raise you flag, get my attention and tap your back pocket.
- If a foul occurs in the penalty area and it is to be a penalty kick, and you think my vision is blocked, make eye contact, and raise your flag. Once the whistle is blown take your position for a penalty kick.

#### Ball in and out of Play

- If the ball goes out of play in your area raise the flag giving direction of play
- If the ball goes out in my half of the field, mirror my call.
- Follow the ball all the way to the goal line when making a call for a goal kick or corner.
- If we have a ball that quickly leaves the field of play and re-enters, raise your flag and get my attention.
- If you see a ball bounce in and out of the net and a goal was scored, raise your flag, make eye contact, and sprint towards the goal line.

### Substitutions

- Signal for a substitution when it will not interrupt the flow of play by the opponents.
- Try to control the player(s) entering the field of play. They are to wait for the player(s) leaving the field of play

### Throw-in

- watch the feet, and I will watch the hands, tell the player where to take the throw-in from if you are close to play.
- When you are unclear of the direction, keep the flag at your side and I will give direction, and you will then mirror my signal.

### Penalty Kick

- If there is a significant defensive foul in the penalty area that I miss, make eye contact, give me a nod, raise the flag, and when the whistle is blown run down and around the corner flag taking your position at the edge of the penalty area.
- Your job will be to watch for significant encroachment from the keeper, if this happens raise your flag. You will also be the judge of the ball crossing the line for a goal.

### Direct Kicks & Corner Kicks

- For Direct Kicks make sure the Attacking team does not move the ball while I am pacing out the 10 yds for the Defensive Wall. If they do raise your flag.
- On a Corner Kick, if I have to deal with pushing etc in the Penalty Area step in front of the ball so they cannot take the kick until the issue is resolved.

Remember, we are a team! Lots of eye contact for communication.
